Objective

I would like to enhance my technical and soft skills by taking up challenging assignments and expanding my knowledge.

Experience

Acmegrade academy
Web development
Remote

14 May 2024 - 14 June 2024

UnizzTech
Web development
Remote

21 Oct 2024 - 20 Nov 2024

Education

Malwa institute of science and technology
Bachelor of technology
Oct 2021-Present —

govt. school for excellence
12th board
Mar 2021 — **84.6%**

govt. school for excellence
10th board
Mar 2019 — **85%**

Skills

- C and C++
- Html5
- CSS3
- JavaScript
- Python
- SQL
- Git and GitHub
- BOOTSTRAP
- React

Projects

Youtube Transcript Summerizer
The YouTube Transcript Summarizer project aims to develop a web-based application that generates concise summaries of YouTube video transcripts. The project uses HTML ,CSS ,JS which creates a user friendly interface and a lightweight Python web framework for the backend to handle summarization processes.

E commerce website
I have developed a fully responsive E-Commerce Website using HTML, CSS, and JavaScript, focusing on a clothing store. The website includes a product listing with features to open individual product pages and a payment options section. It also features a well-designed header, home page, clothing categories, customer reviews, contact section, and footer, ensuring a smooth user experience.
